

High-Strength, High-Conductive Welds

Do you need strong metal welds? Get high-strength, precise, and highly conductive welds every time with Sonobond's ultrasonic welding equipment. Our patented Wedge-Reed System, developed specifically for ultrasonic metal welding, eliminates bending stress, and uniquely welds tinned and oxidized metals.

What can our ultrasonic spot welders and wire splicers handle?

- Spot welding
- Wire-to-wire welding
- Wire-to-terminal welding
- Electrical wire harnesses
- Ignition modules & motors
- Electrical contacts & fuses
- Battery tabs & terminals
- Aluminum & copper foil

Order Our Free Ultrasonic Welding Viability Test. It's a "try before you buy" offer we're happy to make. Contact us today!

See us at EWPTe in Milwaukee, May 15-16, Booth 1303.
